TATA CONSULTANCY SERVICES   2016-2018

PINACLE® (PNC Bank, N.A.):PINACLE is a banking mobile application which helps users to manage their accounts and to perform all the banking activities through this application.

• Designing the architecture of the application as it is moving to a newer technology. In order to make it more modular and to ensure the reusability of components.
• Involved in implementing security measures in the application.
• Involved in implementation of Biometric Authentication.
• Integration of Cordova plugins.

VIPPS (DNB ASA):VIPPS is a mobile application which is used to transfer money between user and business. TaptoTransfer is POC for client for VIPPS in which user can transfer money to each other by just bringing the mobile close to each other. The purpose for this POC is to suggest an idea that android devices are capable to work as beacon station, they can respond to each other by using BLE Technology. This will give user a new personalised manner of transferring funds.

• Creation BLE communication between devices.
• Sending notification to user that they are in payment area.
